**Subject:** Hickman's Egg Farm Tip/Complaint

Dear Mr. Tijerina,

Thank you for contacting the US EPA National Tips Database. Thank you for talking with me about the issues you have experienced and observed with Hickman's Egg Farm. I will look into this issue further with ADEQ. If you would like to share your videos of the dust releases from the facility, please feel free to let me know where your YouTube videos are located.

Thank you,

Janice Chan

HQ LEAD NUMBER: FY16-146662-3714-CV

SUBJECT: Referred to Region - Arizona

FROM: [tijerina372@gmail.com](mailto:tijerina372@gmail.com)

TO:

Name: Raul Tijerina

## **Ex. 6 - Personal Privacy**

Alleged Violator's Name: Hickman egg farm

Alleged Violator's Address: 41625 W. Indian School Rd.

Alleged Violator's City: Tonopah

Alleged Violator's State: Arizona

Alleged Violator's Zip: 85354

Tip or Complaint: Dander dust fills the air. The smell of what smells like a hog farm mixed with the sickening sweet smell of what might be hydrogen sulfide along with the dusty chicken smell is unbearable. Thousands of flies everywhere, all this combined makes for no outdoor living. Today while sleeping, I am working nightshift this week, I woke up to the hickman smell in my bedroom. Enough is enough, I was here first and Hickmans have ruined my life. Can EPA step in instead of handing down the problem to the state of Arizona? I have come to the conclusion that they rely on their BMP that simply does not work. How can you fix a flawed barn design that blows all the contaminants out the back door with these huge fans and say that they can continue doing this because they have a best management program. Their BMP just is not working and is making me sick.

Specific Directions: location is already know.

Violation Still Occurring? Yes

State DEP/DEQ/DEM Notified? No
